What are state energy storage procurement mandates & goals?

This table includes all existing state energy storage procurement mandates, targets, and goals. These terms describe various ways states may set an intention to attain a specified level of energy storage deployment by a specific date, and the role of regulated electric utilities in helping realize that intention.

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

How many energy storage projects are there in Massachusetts?

"Power Advisory notes that there are over 60energy storage projects that are 40 MW or larger proposing to interconnect in Massachusetts offering almost 13,000 MW that have Feasibility Studies, System Impact Studies, Facilities Studies, or Interconnection Agreements," the firm, Power Advisory, wrote in its May report.

Which states have energy storage goals?

A 2021 law, An Act to Advance Energy Storage in Maine, established energy storage goals and directed steps to advance storage deployment. In 2023, Maryland's HB 910 established storage deployment targets. Massachusetts' energy storage target was established in 2018 by An Act to Advance Clean Energy and updated in 2024.

States can establish energy storage procurement targets to jump-start the development of energy storage systems. These targets set a required amount of energy ...

This is the first solicitation pursuant to Section 83E and it is part of a staggered procurement schedule developed by DOER, in coordination with the Distribution Companies, ...

States can establish energy storage procurement targets to jump-start the development of energy storage systems. These targets set ...

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities ...

Applications are invited for New York's first competitive solicitation for a gigawatt of grid-connected energy

storage facilities.

New York State continues to advance its bulk energy storage deployment efforts, and a final Bulk Storage Implementation Plan is now likely to be made public before the end of ...

Under the upcoming bulk storage incentive solicitations, energy storage developers will competitively bid in to be awarded an Index Storage Credit (ISC), which is a ...

FEMP continues to support agencies with identifying and implementing distributed energy projects, including on-site energy, storage, and combined heat and power technologies ...
