@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example ...

Sometimes the spaces get URL encoded to the + sign, and some other times to %20. What is the difference and why should this happen?

OpenSSL Verify return code: 20 (unable to get local issuer certificate) Asked 13 years, 5 months ago

310 A bit of explaining as to what that %20 is : The common space character is encoded as %20 as you noted yourself. The % character is encoded as %25. The way you get ...

The output transformation you need (spaces to %20, forward slashes to %2F) is called URL encoding. It replaces (escapes) characters that have a special meaning when part of a URL ...

I searched and found that versions 23.10.0 and 16.20.2 are present in the folders of the same name C:\Users\KS\AppData\Local\Nvm. By analogy, I created a folder v0.12.2 and ...

I am interested in knowing why "%20" is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.
