What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is mobile energy storage?

Mobile energy storage provides a clean alternative to diesel generators for locations with no grid connection or only a weak one. Grid congestion creates increasingly long waiting times for companies who want to increase their grid connection. Mobile energy storage is the temporary solution to keep your business running.

Housed in a 20-foot container, this system integrates solar PV, energy storage, and advanced control components into a single unit, making it ideal for remote industries, construction sites, ...

Housed in a 20-foot container, this system integrates solar PV, energy storage, and advanced control components into a single unit, making it ...

Volvo Energy is excited to introduce the Volvo PU500 BESS (Battery Energy Storage System), a new mobile power unit designed to meet the growing demand for flexible, ...

Enerbond's battery energy storage solution provides a complete, scalable, and mobile approach to managing power across ...

Our 20-foot container storage solution is not only powerful, but also extremely safe. Equipped with a 4-stage safety concept, fire and gas detection ...

Alfen's mobile energy storage products are sustainably produced, fully recyclable, and ensure zero emissions on-site. Mobile energy storage ...
