Will Holcim & totalenergies bring solar power to Portland cement plant?

Chicago and Houston, March 21st, 2023- TotalEnergies and Holcim U.S. today announced their partnership to bring large-scale solar power and battery energy storage to Holcim's Portland cement plant in Florence, Colorado.

Can solar clinker be used for cement production?

For the first time ever, CEMEX and Synhelion successfully connected the clinker production process with the Synhelion solar receiver, producing solar clinker. This revolutionary innovation is an initial step to develop fully solar-driven cement plants.

Will Cemex & synhelion develop fully solar-driven cement production?

Cemex and Synhelion have made significant progress in their joint effort to develop fully solar-driven cement production. They have scaled their technology to industrially-viable levels, enabling the continuous production of clinker, the most energy-intensive part of cement manufacturing, using only solar heat.

Can solar energy be used in cement manufacturing?

Gonzalez and Flamant (2013) designed a hybrid model that uses solar and fossil fuel energy to fulfill the thermal energy requirement for cement manufacturing. Concentrated solar thermal (CST) is a potential replacement for 40%-100% of the thermal energy needed in a conventional cement plant.

Chicago and Houston, March 21st, 2023 - TotalEnergies and Holcim U.S. today announced their partnership to bring large-scale solar power and battery energy storage to ...

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

Cemex and Synhelion will now take further steps toward building a solar-driven industrial-scale pilot cement plant. "I am convinced we are getting closer to the technologies ...

With the success of the Trident Plant's solar farm, GCC is evaluating the feasibility of large-scale solar projects across its other U.S. and Mexico facilities. Notably, the Trident Plant isn't just ...

Cemex expects the use of solar generated power at the Clinchfield Cement Plant to offset about 10,000 metric tons of indirect CO2 emissions per year, accelerating Cemex's 2030 Scope 2 ...
