actual (countable and uncountable, plural actuals) an actual, real one; notably: (finance) something actually received; real receipts, as distinct from estimated ones.

1. existing in act, fact, or reality; real: an actual case; the actual cost. 2. existing now; present; current: the ship"s actual position.

ACTUAL meaning: 1 : real and not merely possible or imagined existing in fact; 2 : known to be correct or precise not false or apparent

The question of how much electricity a solar panel produces is not answered by a single number, but rather by understanding the difference between instantaneous power and cumulative ...

When evaluating a Solar Panel 150 Watt, here are the key technical features to consider: These numbers give you an idea of what to expect in terms of energy output, ...

You use actual to emphasize that you are referring to something real or genuine.

Electricity generation from solar, measured in terawatt-hours.

On Average, a 150-watt solar panel will produce about 600 watt-hours of DC power output per day. Considering 5 hours of peak sunlight and 20% of solar panels" inefficiency ...
