Which international trade issues will remain a concern for energy storage projects?
Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

How does tariff risk affect a battery energy storage system (BESS) project?
Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability,as tariff changes can significantly affect cost structures and overall project economics.

Will US tariffs affect energy storage?
There have also been indications that the US administration may consider other tariff proposals impacting energy storage,such as a 10-20% universal tariff,tariffs of up to 60% across the board on Chinese-origin goods,and tariffs of 25% on Mexican and Canadian origin goods.

Should tariffs be used as regulatory control?
With respect to energy storage development--and particularly, the supply of batteries and components--which were a priority over both the Trump-Pence and the Biden administrations, it seems more likely that tariffs would be utilized as regulatory control rather than a negotiating tactic.
