What is solarcont GmbH?

SolarCont GmbH is an Austrian joint venture set up in 2022 by container technology specialist Gföllner and Austrian PV system supplier Hilber Solar. This content is protected by copyright and may not be reused. If you want to cooperate with us and would like to reuse some of our content, please contact: editors@pv-magazine.com.

What is solarcontainer & how does it work?

Solarcont, an Austrian startup, has unveiled Solarcontainer, a portable PV generator that can function as a mobile solar plant independent of the electrical grid. In remote areas, it can guarantee stable power supplies and even almost replace public grids with strong power fluctuations, as well as diesel generators.

What is a modular container platform?

The modular platform combines multiple containers with battery and energy storage systems, ensuring easy transportation with standardized ISO 668 container dimensions and a permanent "CSC badge" for security. The container measures 6 meters x 2.4 meters x 2.9 meters and weighs 20 tons.

How many solar modules can be stored in a container?

The container measures 6 meters x 2.4 meters x 2.9 meters and weighs 20 tons. It consists of 240 solar modules placed on a folding system that can be removed and stored. The system has a capacity of up to 140 kW and can extend over a total length of 120 meters (60 meters per side). The result is a maximum possible solar area of around 720 m².

CellCube is a leader in sustainable energy storage, specializing in vanadium redox flow batteries (VRFBs) that allow for efficient and clean storage of large electricity capacities for 4 to 24 hours.
