-----

Firstly, this paper outlines the site selection issues for communication base stations, considering the varying communication needs of users and constructs a site selection ...

Base stations form a key part of modern wireless communication networks because they offer some crucial advantages, ...

In the area of wireless computer networking, a base station is a radio receiver/transmitter that serves as the hub of the local wireless network, and may also be the gateway between a wired ...

Base stations form a key part of modern wireless communication networks because they offer some crucial advantages, such as wide coverage, continuous communications and ...

A wireless communication method of transmitting, from a base station (BS) that includes multiple antenna (AP) ports, multiple first channel state information reference signals (CSIs).

To cope with this complex problem, researchers are increasingly adopting genetic algorithms (GA) and machine learning (ML) methods to improve the deployment efficiency and ...

Provided are a base station device, a terminal device, and a communication method that, in an environment in which a plurality of frame formats are used in a multiplexed fashion, can...
