NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

Explore lithium-ion battery recycling breakthroughs with Reade, from hydrometallurgy to direct recycling, for sustainable energy storage.

A detailed look at startups advancing battery recycling and long duration storage to strengthen the grid and support the clean energy transition.

The aim is to divert "depreciated but functional" EV batteries from the recycling stream and repurpose them into "low-cost, large-scale" energy storage systems that can help ...

At Redwood, we've built a battery supply chain to recover end-of-life batteries and recycle their critical minerals, keeping them in circulation and driving the energy transition.

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

Redwood was founded in 2017 as a battery recycling and materials company by former Tesla CTO JB Straubel, but this year expanded into deploying battery energy storage ...

-- I was supposed to be looking at the largest energy-storage installation ever assembled from used electric-vehicle batteries, the tantalizing new side project of former Tesla ...
