-----

Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

The city's new 140MW photovoltaic + storage project isn't just another solar farm - it's Serbia's first large-scale marriage of solar generation with lithium-ion battery storage.

A sudden power outage hits Belgrade during peak tourism season. Hotels lose AC, traffic lights go haywire, and ice cream shops face a meltdown (literally). Enter mobile energy ...

Turkey-based developer and IPP Fortis Energy has acquired a solar and battery energy storage system (BESS) project in Serbia. The ...

There are exponential opportunities for energy storage investments to facilitate the green transition, main developers and ...

Investments in battery energy storage systems (BESS) is ramping up around the world and Serbia is now making its first steps.

“They are building a very modern mine and we are a potential customer. Conventional energy storage systems, such as pumped hydroelectric storage, lead-acid batteries, and ...

Panelists agreed that new technologies, including thermal energy storage, can effectively enhance the stability of intermittent energy production from renewable sources.
