How many mw subsidized battery storage in Greece?

Home &#187; News &#187; Renewables &#187; Greece awards 188.9 MWfor subsidized battery storage in final auction Greece's third energy storage auction has been completed,with nine projects selected and a capacity of 188.9 MW.

How many MW of Bess are there in Greece?

As of early 2025,Greece has approximately 100 MWof operational BESS,comprising a small number of FTM (front-of-the-meter) projects and pilots developed prior to the 2023 tenders. Several additional systems became operational in 2024,but the bulk of large-scale storage capacity remains under development.

What are the challenges faced by Bess developers in Greece?

Beyond financing,regulatory and grid-related bottlenecks pose further challenges. Although Greece has established a comprehensive policy framework for BESS,developers report that environmental permitting,connection approvals,and the physical capacity of the gridremain major obstacles.

Does Greece still subsidize Bess?

Moving forward,Greece is abandoning subsidizing BESS via auctions. Instead,the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support.
