How much does a solar system cost?

On average, residential solar installations range from \$24,000-\$36,000 after applying federal tax credits. A 15,900 kilowatt-hour (kWh) system of 18-34 panels for a standard three-bedroom home costs an average of \$24,222, according to our survey. However, solar costs can vary widely depending on where you live.

How much does a monocrystalline solar system cost?

They're typically used in large-scale or specialty applications. For example, a 6 kilowatt (kW) monocrystalline system may cost around \$1,000-\$2,000 more than a polycrystalline system but could generate more power in a smaller footprint.

How much does solar cost in New York?

Prices range from \$28,930 to \$39,140, but after the federal tax credit, that drops by 30%, and New York has some great local incentives as well. However, the federal tax credit is now set to expire after 2025, following recent legislative changes. If you're considering solar, starting the process now could save you \$10,211.

How much does a solar loan cost?

Some states offer additional rebates of up to \$5,000 for residential installations. Financing options such as solar loans typically charge \$3,000-\$8,000 in interest over the loan's life, but monthly payments are often lower than current electricity bills.

The primary costs associated include the purchase of solar panels, inverters, and mounting equipment. Panels can significantly vary in price, with options like monocrystalline, ...
