What is medium voltage switchgear?

Medium voltage switchgear, or MV switchgear, protects electrical systems rated between 1kV and 75 kV. Common medium voltage switchgear ratings include but are not limited to 5kV, 15kV, 22kV, and 35kV. MV switchgear is used across commercial and industrial applications, commonly using air circuit breakers as their method of circuit protection.

What is a parallel switchgear?

Productivity, protection, efficiency, and versatility. Paralleling or parallel switchgear is used when you need to control one or more generators or power sources. They are commonly used across industrial and commercial, low and medium voltage applications where emergency power is of utmost importance.

Who is OEM switchgear?

In addition we are distributors and original equipment manufacturers utilizing switchgear components from many of the world's most popular brands. Our OEM switchgear is designed and manufactured to provide years of safe, trouble free service and meet or exceed all applicable ANSI, IEEE and NEMA standards.

What is MV switchgear?

MV switchgear is used across commercial and industrial applications, commonly using air circuit breakers as their method of circuit protection. That being said, air insulated medium voltage switchgear is becoming a popular choice, especially due to its safety features and cost-effectiveness.
