-----

Discover battery management system testing from Rohde & Schwarz in order to ensure performance and safety by emulating battery cells used in electric vehicles.

The system interfaces with a battery management system (BMS) via CAN-BUS and performs a charging/discharging cycle followed by state-of-charge verification. Final test ...

The ART Logics BMS Function Test Bench is an all-in-one standard load box designed for Battery Management System (BMS) testing. It provides a ...

Whether you are working on battery systems for mobile or stationary applications, we offer a powerful solution for testing the battery management systems required for state-of-the-art ...

The test stand itself simulates and controls all inputs to the BMS (cell voltages, temperature sensors, current sensors, CAN data, etc.), providing the ability to subject the BMS to a ...

The test bench developed with BeeMS Engineering is dedicated to our new BMS for the "motor scooter battery" production line, and allows us to : simulate up to 14 battery ...

Integrated real-time system and fault injection unit for comprehensive ISO26262 Up to 1200V/900A battery module simulation voltage and current, actual verification and calibration ...

Bloomy's family of BMS test systems provides a consistent platform for engineers to bring a BMS to market faster, and more reliably.
