---

A new advance in bromine-based flow batteries could remove one of the biggest obstacles to long-lasting, affordable energy storage. Scientists developed a way to chemically ...

In Bosnia and Herzegovina, which only recently got its first utility-scale solar power plant, coal and power producer EPBiH is gradually shaping its energy transition projects.

Flow batteries, which store energy in liquid electrolytes housed in separate tanks, offer several advantages over traditional lithium-ion ...

Iron-saltwater flow battery company ESS Inc looks set to deploy by far its largest project to-date, a 50MW/500MWh system at a renewables hub from German energy firm LEAG, with potential ...

Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission network, which will provide auxiliary services.

A commonplace chemical used in water treatment facilities has been repurposed for large-scale energy storage in a new battery design by researchers at the Department of Energy's Pacific ...

Mhor Energy has developed a rechargeable liquid flow battery capable of storing electricity for 20-25 years, presenting a significant advancement in grid-scale energy storage.

Energy storage beyond lithium ion explores solid-state, sodium-ion, and flow batteries, shaping next-gen energy storage for EVs, grids, and future power systems.
