Who provides electricity in Bulgaria?

Electricity is supplied by three main providers: CEZ, E.ON and EVN. Each company targets a specific area of the country - the west, north-east and south-east respectively. The electricity supply in Bulgaria is delivered to homes at 220/240 volts (V) with a frequency of 50 Hertz (Hz).

What does Bulgaria's surge in storage capacity mean for Europe?

As Europe races toward climate neutrality, Bulgaria's surge in storage capacity signals a shift not only in national priorities but also in regional energy dynamics.

Why is energy storage growing in Bulgaria?

Energy storage in Bulgaria is expanding rapidly as the government awards nearly 10 GWh of capacity to 82 projects, boosting renewable energy reliability and grid stability.

How will the selected storage systems be distributed in Bulgaria?

The selected storage systems will be geographically distributed across Bulgaria and connected either to the national transmission grid or local distribution networks. All awarded projects must be operational by March 2026.

Bulgarian firm International Power Supply (IPS) has commenced construction of its second battery energy storage system (BESS) production facility in Sofia, Bulgaria, which will ...

In an interview, she discussed the company's ongoing capacity expansion and future growth plans, as well as major market trends and ...

With the surge in photovoltaic capacity, ambitious plans for renewables overall and a collapse in the coal power segment, Bulgaria needs urgent grid upgrades alongside energy storage.

As a result of the high economic growth in the last 3 years, industrialisation and urbanisation, the demand for new energy generation sources to replace the coal-based power ...

It is the first gigafactory in Bulgaria for battery energy storage systems (BESS). Recognized by the European Commission as a ...
