Chad Trade Statistics including exports and imports by partner and products,tariffs and relevant development indicators.

How does Chad generate electricity?

Chad currently generates electricity by consuming oil. With the declining cost of new solar generation plants,the Government of Chad and development partners have prioritized solar power throughout the country. Machinery and parts for electricity transmission and distribution are also in demand. Opportunities

Why is Chad a good place to invest in solar power?

Chad's location in the Sahel,which features brilliant sunshine especially during the dry season,and lack of alternate fuel sources such as coalmake solar power an attractive export and investment sector. Chad currently generates electricity by consuming oil.

Does Chad earn a positive net export?

Historically,Chad earns highly positive net exportsprincipally in the international trade of crude petroleum oil. In turn,these cashflows indicate Chad's competitive advantages under the mineral fuels-related product category. Below are exports from Chad that result in negative net exports or product trade balance deficits.
