Do Chinese solar power inverters have undocumented communication devices?

However, undocumented communication devices have reportedly been found in some Chinese solar power inverters. And over the past nine months, such devices--including cellular radios--have also been found in some batteries from Chinese suppliers.

Could hidden communications equipment be found in Chinese-manufactured solar energy parts?

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Does China have a grip on energy infrastructure?

NATO added that China's grip on energy infrastructure is deepening. "We must identify strategic dependencies and take steps to reduce them," a NATO official said. With critical infrastructure at stake, governments are being pushed to act before the risk escalates further.

Are solar inverters made in China?

The big issue here, given the newfound concern, is just how integrated into the American (and global) energy grid that Chinese-manufactured parts have become. Research from Wood Mackenzie indicated that about 78% of all solar inverters are made in China.

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

Rogue communication devices have been discovered in Chinese-made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters ...

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

Undocumented radios found in Chinese-made solar inverters pose a threat to U.S. energy infrastructure and
