What is the Columbia Energy Storage Project?

Sign up for WPR's email newsletter. The Columbia Energy Storage Project would store excess energy from the electric grid by converting carbon dioxide gas into a compressed liquid form and then converting that liquid back into a gas, powering a turbine to generate electricity, according to the Department of Energy.

What is Alliant Energy's Columbia Energy Storage Project?

Alliant Energy's revolutionary Columbia Energy Storage Project, using Energy Dome's safe, reliable CO<sub>2</sub> battery, represents a significant advancement in energy storage while bolstering the power grid to benefit Wisconsin customers.

Will Alliant Energy build a carbon dioxide based energy storage system?

Alliant Energy utility Wisconsin Power and Light, Madison Gas and Electric Co. and Wisconsin Public Service Corp. have requested approval from the Public Service Commission of Wisconsin to construct an up to 20-MW, carbon dioxide-based energy storage system near Portage, Wisconsin, called the Columbia Energy Storage Project.

Where will a new energy storage system be built?

The energy storage system will be built south of Portage, Wisconsin in the town of Pacific and near Alliant Energy's existing Columbia Energy Center. Construction is expected to begin in 2026 and be completed by the end of 2027.

At the heart of the project is a proprietary technology developed by the Italian startup Energy Dome, which uses carbon dioxide as the storage medium. In simplified terms: ...

The Columbia Energy Storage Project is the first long-duration energy storage project of its kind to be developed in the United States. The ...

The Columbia Energy Storage Project was selected for a grant to support the construction of a compressed carbon dioxide long-duration energy storage system at the site of the Columbia ...

Alliant Energy's revolutionary Columbia Energy Storage Project, using Energy Dome's safe, reliable CO<sub>2</sub> battery, represents a significant advancement in energy storage ...

Spearheaded by Alliant Energy and developed by Energy Dome, this project aims to address the limitations of
