As we approach Q4 2025, industry watchers are keeping tabs on Latvia's first gigafactory for battery cells. When operational, it'll slash import costs by 60% and create 800+ skilled jobs.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

d in Salaspils in 2019 (see Fig. 2). The project backed by EU, developed by LTD Filter, the Baltic energy solution specialist, and Arcon-Sunmark, the Danish solar heating specialist. ... Also, ...

Discover how battery technology is reshaping energy storage economics in Latvia's renewable energy hub. Learn about cost trends, local applications, and why Liepaja is leading the charge.

Choosing a solar factory location? Our cost analysis compares Latvia and Lithuania on labor, energy, logistics, and tax to help you make the right investment.

Riga's updated National Energy and Climate Plan targets 57 % renewables in the power mix by 2030 and calls for major investment in storage to smooth the impending break ...

Manufacturers like Stora Enso Latvia now use ESS to lower energy costs. By storing cheap off-peak electricity, they avoid price spikes during production hours--saving an estimated ...

Latent thermal energy storage (LTES) and leveraging phase change materials (PCMs) offer promise but face challenges due to low thermal conductivity. This work ...
