Where are solar panels made?

Until recently, most of the solar panels installed in the United States were not actually made here. Instead, they were manufactured overseas--mainly in China--where production costs were lower. However, a shift has taken place in the American solar industry over the past few years.

Which solar companies are based in America?

Although only one of the top five manufacturers (First Solar) is fully U.S.-based, many other American companies are expanding their solar manufacturing operations. Smaller firms like SEG Solar, Solar4America, and Mission Solar continue to grow, while new factories are opening across the country.

Where are illuminate solar panels made?

The company's main manufacturing facility is located in Pataskala, Ohio, where over 1,000 workers produce high-quality solar panels. With an annual capacity of 5 GW, Illuminate USA plays a crucial role in supplying American-made solar panels for both residential and commercial projects.

Where are qcells solar panels made?

Despite its foreign ownership, Qcells has a significant U.S. presence, with regional headquarters in Irvine, California and four manufacturing plants in Georgia. Qcells specializes in high-efficiency silicon solar panels, making it a popular choice for residential and commercial installations.
