How much energy does a 5kw solar system generate in Canberra?

As a result, an unshaded north-facing 5kW solar system in Canberra can generate around 7,120 kWh of electricity every year\*. Most solar households use about half of the energy generated by their PV panels. So, they can 'export' unused solar energy into the grid and earn a feed-in tariff (FIT) payment.

How many solar panels are installed in Canberra?

Over 11,281 small-scale systems have been installed in Canberra, ACT with a collective capacity of 10,631 kW. Around one in ten households in Canberra, ACT, generates solar power through rooftop installations, contributing to the territory's goal of reaching and maintaining 100% renewable energy.

How does solar self-consumption & feed-in tariff work in Canberra?

Maximize Savings with Solar Self-Consumption and Feed-In Tariff: Canberra residents can reduce energy bills through solar self-consumption and earn credits for excess power sent to the grid. Shop around for the best feed-in tariff rates for optimal savings.

How much does a solar system cost in Canberra?

Solar Choice regularly publishes articles with indicative pricing for PV systems in Australia's capital cities (including Canberra) in our Solar Choice Price Index. Based on the price index data from March 2025, we can see that in Canberra a typical 6 kw solar system would cost \$5,420 on average after deducting the STC rebate and including GST.

Communication Base Station Power Consumption & Electricity Cost Calculate the energy consumption and running costs of your Communication Base Station efficiently with our tool.

A solar feed-in tariff is the rate your energy provider pays you for the solar energy you generate which is sent back to the grid. Below you will find some of the solar feed-in tariffs ...

In this guide, you'll find up-to-date details on solar system pricing, potential solar energy generation specific to Canberra's conditions, and the latest rebates and incentives ...

In Canberra, the feed-in tariffs typically range from 5 to 15 cents per kilowatt-hour (kWh) for exported solar energy. The exact rate can vary based on the energy provider and ...

In Canberra, the savings from installing a solar system depend on its size and your energy consumption.
