"Despite regulatory uncertainty, the drivers for energy storage are strong and the industry is on track to produce enough grid batteries in ...

US battery storage hits record 5.6 GW in Q2 2025, led by utility-scale growth, but sourcing rules may slow future gains.

The second-quarter record came despite weak residential activity and uncertainty over the policy impacts of the 2024 election, the report said.

Outside of Texas, planned energy storage inventories are experiencing a boom. Led by Arizona, inventories grew from 3 GW in the second quarter of 2024 to 7 GW currently. ...

Average grid-scale battery storage costs declined 4% in Q2, far from the 39% quarter-on-quarter decline recorded in Q1. Lithium prices were relatively steady, seeing a ...

The US energy storage market installed 3,011 MW and 10,492 MWh in the second quarter of 2024, marking the second-highest quarter on record, following the fourth quarter of ...

The Electric Reliability Council of Texas took over as the US region with the most operating battery storage capacity, adding 51.5% of the 6,239 GW installed across the US in ...

The US energy storage market installed 3,011 MW and 10,492 MWh in the second quarter of 2024, marking the second-highest quarter on record, following the fourth quarter of 2023 when ...
