What does the Energy Planning Board do?

The Energy Planning Board directs the development of the State Energy Plan, guided by Article 6 of the Energy Law. In September 2024, the Board released and invited public comment on the scope for this planning cycle.

How long has the PSC been working on an energy storage plan?

Efforts towards a finalized implementation plan have been ongoing since June 2024, when Governor Hochul first announced that the PSC had approved an Energy Storage Roadmap in furtherance of the state's goal to achieve six gigawatts ("GWs") of energy storage by 2030.

What's happening with the State Energy Planning Board?

As it seeks to gather input from the public, the State Energy Planning Board is hosting virtual and in-person hearings during August and September to educate people about the effort. NYSERDA Senior Advisor for policy and analysis Hillel Hammer is focusing on the public health impact analysis of the plan.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.
