What is a solar pump inverter?

Compared to diesel generator pumps, our solar pump inverter are environmentally friendly, with a long lifetime and low maintenance costs. It is independent from the grid and produces no pollution or noise. Typical applications are irrigation, community water supply, fish farming and agriculture.

Why should you choose a solar pump inverter?

Half of the energy produced around the world is used to operate pumps. Compared to diesel generator pumps, our solar pump inverter are environmentally friendly, with a long lifetime and low maintenance costs. It is independent from the grid and produces no pollution or noise.

What is the RSI off-grid solar inverter?

Grundfos has sourced the RSI off-grid solar inverter to enable us to expand the family of solar submersible pumping systems. The RSI is designed specifically to be compatible with a wide range of the famously reliable SP submersible pumps.

A complete list of component companies involved in Inverter production.

Solar-powered water pumping systems are transforming Estonia's agricultural and industrial sectors. This guide explores how photovoltaic pump inverters optimize energy efficiency, ...
