Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Will Georgia Power build a battery energy storage system?

Georgia Power has started construction on four battery energy storage systems across the state. The projects will add 765 megawatts of generating capacity, enough to power approximately 573,750 homes. Two facilities will be built near Air Force bases, one at a retired coal plant, and another will expand an existing facility.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

What does Georgia Power do?

"At Georgia Power, we work with the Georgia PSC and many other stakeholders to make the investments required for a reliable and resilient power grid, integrating new technologies to better serve our customers today and as Georgia grows," said Rick Anderson, senior vice president and senior production officer for Georgia Power.

Two facilities will be built near Air Force bases, one at a retired coal plant, and another will expand an existing facility. The projects were approved by the Public Service ...
