Will Ghana become a regional hub for energy trading in West Africa?

This project aims at positioning Ghana as the destination for energy trading in the West Africa sub-region. This agreement is a critical step towards the President's vision of Ghana becoming a regional hub for petroleum refining, storage, and distribution.

Could wind power be a viable energy source for Ghana?

Wind energy also holds untapped potential, particularly along Ghana's coastal regions, where wind speeds are favorable for electricity generation. Integrating wind power, solar, and battery storage solutions to complement the thermal plants could provide a stable and reliable energy supply for the country.

How has the new government impacted Ghana's energy sector?

The new government led by H.E. John Dramani Mahama has signaled a commitment to greening the national grid by expanding the scope of the Energy Ministry to include the Green Transition in its portfolio. This marks an important policy shift towards greening Ghana's energy sector.

Can Ghana decarbonise the energy sector?

By Edward Acquah Accra, May 27, GNA- As the world races to transition from fossil fuel to renewable energy, Ghana has developed a National Energy Transition Framework (2022-2070) to decarbonise the energy sector to help achieve net zero targets as part of commitments under the Paris Agreement.

Genser signed a build, operate and transfer agreement with Golden Star Resources for the delivery of a power plant to power its Bogoso Gold Mine, an open and underground mine ...
