-----

This month, the largest offshore solar PV project build in the open sea (not a lake) was deployed, and it's rated at 1,000 MW, or one gigawatt.

The project, Gigawatt 1 &#174;, includes the largest behind-the-meter solar plus battery project in the world and will create more than 1,000 new jobs.

Located in Clark County, Nevada, the power plant is the biggest single-phase co-located solar and storage plant in the country.

China's first gigawatt-level offshore photovoltaic (PV) project, currently the largest open-sea solar installation in the world, has been fully connected to the grid, marking a major ...

A 1.3 gigawatt (GW) solar farm in northern Indiana is all set to become one of USA's largest solar power projects following an agreement between Philadelphia-based ...

In this ambitious project, the Abu Dhabi clean energy company Masdar, will combine 5GW of solar capacity with 19GW hours of battery storage. This will enable the ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

China has brought a massive offshore solar farm online - a full 1 gigawatt of photovoltaic capacity built at sea. The Guohua Investment Shandong HG14 Offshore ...
