The clean energy revolution begins with China's first gigawatt-scale offshore solar power plant. Up-to-date news on breakthrough technology in renewables.

Located eight kilometers offshore from Dongying of Shandong, the project marks a significant milestone for both China and the global offshore solar industry, it said. The one ...

The installation is China's first gigawatt-scale fixed-pile offshore PV project and the first offshore solar facility approved under a national three-dimensional sea-use rights framework.

Located eight kilometers offshore from Dongying of Shandong, the project marks a significant milestone for both China and ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

MSNChina flips on world's largest vanadium flow battery beside 1GW ...China has switched on a record-breaking vanadium flow battery in Xinjiang, pairing it directly with a 1 gigawatt solar farm to soak up desert sunshine and feed it back into the grid after dark ...

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...

As one of China's first large-scale renewable energy bases with a capacity exceeding 10 gigawatts, the base is set to develop eight gigawatts of solar power, four ...
