-----

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a ...

Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon ...

This Review discusses the application and development of grid-scale battery energy-storage technologies.

Battery Energy Storage Systems are at the heart of the clean energy transition, addressing the challenges of renewable energy integration, grid stability, and energy access. ...

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities.

Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon emissions.

We are the leading developer of community-scale battery energy storage systems (BESS) in the New York City metropolitan area.
