What is a greenhouse curtain system?

The greenhouse curtain system is an essential component of the greenhouse facility, designed to optimize the growing environment for plants. The system is available in both manual and automatic options, and is designed to effectively control light, temperature, and humidity levels within the greenhouse.

Does Insongreen offer a greenhouse curtain system?

Your Greenhouse Requirements (Optional) INSONGREEN provides affordable retractable shade curtain systems and thermal and energy curtain systems for commercial greenhouses worldwide.

What are the benefits of a greenhouse curtain system?

Shade: The greenhouse curtain system provides essential shade to protect plants from excessive sunlight, thereby preventing overheating and reducing rapid evaporation of necessary plant moisture. This promotes healthier and more resilient plant growth.

Why do greenhouses have high shading rate curtains?

Additionally, these high shading rate curtains prevent light pollution by blocking excess artificial light from escaping the greenhouse at night, thereby maintaining the natural night-time environment outside and reducing the impact on neighboring areas. Have any Questions?
