What is a pressurised container?

A pressurised container is a versatile, sealed container or vessel that can be used in development laboratories as well as in large production facilities. The pressure inside the container is higher than the ambient pressure, thereby making pressurised processes, such as sterilisation or transfer, safe.

What container types are available at Thomas scientific?

Other container types available at Thomas Scientific are our carboys, lab cups and collection containers. Manufactured from strong, autoclavable Polycarbonate (PC), Cryo Boxes are designed to be used at temperatures between -196°C to 121°C.

What is a graduate lab container?

Graduated lab containers provide and enable accurate and precise measurements of volumes with volumetric markers, which is crucial for quantitative analysis and preparation. Autoclavable plastic containers are manufactured from premium plastic and can withstand heating or cooling applications.

What is a sterile container?

Sterile containers prevent contamination or evaporation of samples when used with lids or caps to contain samples. Scientific containers provide safety and containment benefits, minimizing the risk of exposure to personnel within the lab and ensuring safety during applications.

Order your Duraporter online with Heathrow Scientific today & receive free shipping and fast delivery.

Search for used market price of high pressure folding containers for base stations. Find Mitsubishi and Proman for sale on Machinio.

Browse a full range of Mailing and Shipping Containers products from leading suppliers. Shop now at Fisher Scientific for all of your scientific needs.

Whether you need a biochemistry lab in the heart of the city or an environmental testing station deep in the forest, a shipping container lab can be there no construction required. This shift ...

These modular container labs are ideal for environmental monitoring, clinical trials, and remote data collection, offering 20 ft. and 40 ft. containers that are weather-resistant, quickly ...
