How much power does a 5kw Solar System produce?

Generally, a 5kW solar system generates about 5,000 wattsof Direct Current (DC) power. However, if you account for system losses incurred by the above variables, you could potentially decrease the efficiency of your solar panels by roughly 5%. How many panels does a 5kW solar kit contain?

What types of solar kits are available?

Choose from a selection of 5kW solar kits with string inverters, microinverters and SolarEdge inverters, as well as ground mount options. We sell both grid-tie and off-grid solar kits.

How much space does a 5kw Solar System need?

A 5kW solar kit from GoGreenSolar requires about 299 square feetof space. Solar panels with string converters need to be grouped together and facing the same direction. You'll want to consider whether this option is the right choice for you or if you'd be best served by solar panels with microinverters.
