Why is Delhi launching a solar energy project?

Sood added that the Delhi government is committed to investing in advanced energy technologies and will offer support to entrepreneurs working in the solar energy sector. "This project not only contributes to clean energy storagebut also marks the beginning of a new era of innovation in power management," he said.

Will Govt deploy solar energy technology in Delhi?

The power minister said that the govt would deploy this new technology in Delhiand ensure the required investment for the same. "Entrepreneurs keen to work in the solar energy sector will also be supported with necessary facilities to help ensure continuous and sustainable power supply.

How will Delhi's new solar system affect electricity costs?

In April 2025,the Delhi assembly introduced a plan to install a 500 kW rooftop solar system within 100 days. Currently,the assembly has two 100 kW solar plants. The proposed expansion is expected to cut electricity costs by approximately Rs 1.5 million per month.

How many MWh does a solar project have?

Each of these projects has a capacity of at least 1 MWh. Naik's statement comes amid growing focus on grid stability and renewable energy integration,especially as solar installations scale rapidly.

During the last twelve months, four lead projects--totalling nearly 150 MW of capacity--have progressed to advanced stages of ...
