Does a cruise ship consume more electricity than a container ship?

Consumption is highly dependent on laytime, the type of ship, and the cargo. He explains, "A cruise ship consumes significantly more electricity than a container ship, but the laytime is shorter."

Do container shipping lines need shore-side power?

Many container shipping lines calling at Hamburg have already gained experience with shore-side power in non-European ports. In Los Angeles, shore-side power has been mandatory since 2014, and some Asian ports already mandate the switch to shore-side power.

Why should you use iContainers' ocean freight calculator?

For businesses or individuals looking to ship small parcels or documents by air. In a world where shippers want everything quick and fast, a turnaround time of two days for shipping rates no longer cuts it. iContainers' ocean freight calculator eliminates that problem by providing instant shipping quotes.

Which port charge maximizes societal net benefits?

The port charge $C_{p,w}$ which maximizes societal net benefits is therefore the marginal cost to the port of providing shore power access and the external marginal cost, which is negative: $C_{p,w} = C_a + \frac{1}{2} C_{O_2} + \frac{1}{2} C_{CO_2} + \frac{1}{2} C_{SO_2} + \frac{1}{2} C_{NO_x} + \frac{1}{2} C_{PM_{10}}$

Understand how container prices are determined, what drives fluctuations, and how to plan for cost-effective logistics.

Our calculator estimates shipping costs for multiple destinations and trade lanes. Just input your country details to compare rates and find the best ...
