Does a Solaris air purifier have UV light?

Add the optional Solaris's Germicidal UV Light for coil and surface disinfection. The Solaris's Air Purifier is designed to interface with the UV Light for coil and surface disinfection. The UV Light keeps mold from growing on wet interior HVAC components particularly the cooling coil -- often a major source of airborne mold allergen.

How long does a Solaris air purifier last?

The UV lamp has a 2-year life and is warranted for the full 2-year lifespan. Add the optional Solaris's Germicidal UV Light for coil and surface disinfection. The Solaris's Air Purifier is designed to interface with the UV Light for coil and surface disinfection.

How can I reduce the cost of air purifier installation?

Reduce total project cost by having multiple vendors bid on the same, detailed work specification of your Air Purifier project. Save on installation costs by combining similar jobs and by being willing to have your project completed during low demand periods for the vendor/installer.

How many square inches does a Solaris purifier have?

The Solaris purifier features 249.7 square inches of active PCO purification surfaces-- more than any other active photocatalytic purifier in its class. The unique Photon Clarifier(TM) has been awarded patents for its independent photocatalytic (PCO) control.

The unit will clean air at a rate of 114 cu. ft./minute, and its PM2.5 IR sensor will detect very fine particles that are 2.5 microns or smaller. Its long-lasting filter has a reset button that will ...

The unit will clean air at a rate of 114 cu. ft./minute, and its PM2.5 IR sensor will detect very fine particles that are 2.5 microns ...

Powerful Motor: This purifier features a larger filter and a powerful motor ...

Harnessing solar power to energize air purifiers is a sustainable solution for improving indoor air quality. Let's explore the benefits and ...
