How much does an on-grid solar system cost?

On-grid systems are built to support energy needs but do not serve as your only electricity source. This means they're smaller and cost less than off-grid options. The average cost of solar panels for an on-grid, 5 kilowatt-hour (kWh) system is \$15,000-\$20,000. An off-grid system costs more than twice as much.

How much does a solar system cost?

Most homes need a 5- to 10-kW system to generate enough energy for a standalone solar power system. For comparison, a 5- to 10-kW grid-tied solar panel system costs \$15,000 to \$45,000 installed on average. Get free estimates from solar panel installers near you. What are off-grid solar systems?

How much do off-grid solar systems cost in 2025?

The average cost of installing an off-grid solar system to your home is \$51,000, but the cost typically varies from \$32,500 to \$69,500. Green energy solutions are more than a passing trend, and off-grid solar systems are available anywhere you find the sun.

Does an off-grid solar system work with a large home?

Yes, off-grid systems work with any residential home, even larger ones. Off-grid systems work best for remote homes or those with limited access to utility power. Due to their size and power capacity, off-grid systems are more expensive than grid-tied solar systems.

Off-grid solar systems typically cost between \$45,000-\$65,000 for a complete home setup, significantly more than grid-tied ...

Depending on your chosen system, the off-grid solar systems in our inventory cost between \$6,595 and \$38,995. There are a few ...
