How do you pay for a solar system?

There are three main ways to pay for your home solar system: upfront with cash, a solar loan, or through a lease or power purchase agreement (PPA). If you can't afford to pay for your system out of pocket--or don't want to tie up that capital--solar financing allows you to spread the cost over time through a loan or lease.

How much money can a home solar system save?

Most homeowners save around \$50,000 over 25 years. What are your solar financing options? There are three main ways to pay for your home solar system: upfront with cash, a solar loan, or through a lease or power purchase agreement (PPA).

How much does a solar system cost?

Let's say a 5.7 kW solar system costs \$20,000 (\$14,000 after the tax credit) and produces 208,000 kWh of electricity over its 25-year warranted life. If you take out a 12-year combo loan, you pay \$18,645 for the system for a levelized cost of 8.9 cents per kWh.

What if I can't pay cash for solar?

If you can't pay cash for solar, there are solar loans to help you start saving. Solar loans are flexible because they typically require \$0 down and offer loan terms between 8-20 years. This allows you to design a loan with a monthly payment that you are comfortable with, and essentially choose your own electricity rate.

Provide preliminary payment estimates - By inputting your credit score, loan amount, loan term, and estimated system cost, the calculator forecasts monthly payments to help with initial ...

What are the payment options for my system? Traditionally, there have been four options to pay for a solar energy system. Two are direct purchases, where you own the system, and two are ...
