Caterham's upcoming EV sports prototype, Project V, will adopt immersion-cooled battery packs developed by Xing Mobility Inc. These battery packs will provide "exceptional ...

Direct liquid cooling, also known as immersion cooling, is an advanced thermal management method where battery cells are submerged directly into a dielectric coolant to ...

More specifically, Caterham opted for a battery family called Immersio Cell-to-Pack (CTP). The hardware uses battery cells immersed in a dielectric liquid to keep itself cool and ...

Caterham will integrate immersion-cooled battery packs developed by XING Mobility Inc. into its Project V EV sports coup&#233; prototype. This innovation promises enhanced ...

In collaboration with Motul, GCK Battery has developed immersive batteries that can be recharged ultra-fast in less than ten minutes. The immersive battery is a 48V module whose ...

LION Smart GmbH developed a light-weight battery pack with integrated immersive cooling technology using 3M Novec fluids, which can be used in automotive or ...

From the simulation of a cell to the manufacture of a complete battery pack EXOES has developed a unique expertise in cooling lithium-ion batteries by immersing their cells in a ...

Battery packs equipped with immersion cooling technology are widely implemented in electric vehicles, electric surfboards, commercial boats, off-highway vehicles and even aerospace ...
