What is the energy transition strategy & action plan (ETSAP)?

This Energy Transition Strategy and Action Plan (ETSAP) has been developed to guide the continent's transition towards a net-zero emissions target, aligned with the global goal, but in Africa's case, without diverting from the urgent objective of achieving socio-economic development.

What AU initiatives have shaped the future of energy transition?

The key AU initiatives that have provided insights into the future of energy transition are the AfSEM, the CMP, and the AfEES.

How do I implement a demonstration programme for energy-efficient buildings?

Implement demonstration programmes for energy-efficient buildings

1. Select pilot Member States representing diverse economic and climatic contexts
2. Choose building types (residential, commercial, institutional) for EE retrofits or new builds
3. Document cost-benefit analyses (energy savings, payback periods)
- 4.

Explore policy frameworks, market incentives, business models and technical standards needed to attract investments in Africa's energy storage sector. Highlight best practices and lessons ...

This report is part of the IRENA series on Planning and prospects for renewable power: Africa, which focuses on renewable electricity generation in African power pools.

The success of the household energy storage market depends not only on the cost of generation and storage hardware, but also on the affordability of end-use appliances.

Despite the abundant potential, several challenges impede the large-scale implementation of energy storage solutions in Africa. The high upfront costs associated with ...

The Energy Transition Strategy and Action Plan (ETSAP) is a continental framework developed by the African Energy Commission of the African Union as a guiding framework for Africa's ...

The adoption of renewable energy storage systems is a primary driver for the rise in expanding electricity
