Does internal rate of return matter in battery storage systems?

Author to whom correspondence should be addressed. This paper assesses the profitability of battery storage systems (BSS) by focusing on the internal rate of return (IRR) as a profitability measure which offers advantages over other frequently used measures, most notably the net present value (NPV).

Is the internal rate of return a profitability measure for battery storage systems?

Multiple requests from the same IP address are counted as one view. This paper assesses the profitability of battery storage systems (BSS) by focusing on the internal rate of return (IRR) as a profitability measure which offers advantages over other frequently used measures, most notably the net present value (NPV).

What is internal rate of return (IRR)?

Internal Rate of Return (IRR) This paper is based on the IRR as a key economic metric for assessing the profitability of investment projects.

Should internal rate of return (IRR) be used to assess profitability?

We argue in favour of the internal rate of return (IRR) as a preferred method to assess profitability given the advantages over the popular net present value (NPV) and many other frequently used profitability measures.

Adopting a holistic approach that considers all revenue streams across a broad range of external events could improve the outlook of energy storage returns.

These calculations help provide a comprehensive understanding of the cost-effectiveness, return on investment, long-term operating costs, and net cash flow of an energy ...

This approach comprehensively considers the initial investment of the energy storage system, operation and maintenance costs, the benefit-sharing mechanism of contract energy ...

This is the text version for a video--Levelized Cost of Electricity (LCOE) and Internal Rate of Return for Photovoltaic (PV) Projects--about how NREL conducts such pro forma analysis.

To derive the PlusDR payoff in Model II, we introduce the concept of internal rate of return (IRR), which is a discount rate at which the net present value of an investment equals zero and is a ...
