-----

Highly configurable battery powered inverter designed to control ancillary pumps and fans. The HVLP is capable of operation up to 800VDC and 33A continuous.

The range of the DC input is designed to be compatible with both single and three-phase AFE systems while supporting a wide DC output voltage range of 480V-800V.

Wide-Vin isolated Flyback DC/DC converter over the Ultra wide input voltage range of 40V to 1000V DC, up to 1200V transient. Regulated output voltage 15V (<5% regulation) and output ...

High-power AC-DC and DC-DC converter units with high efficiency and reliability. Modular units suitable for most modern applications.

This range of High Voltage DC/DC products are designed to satisfy the current trend to use higher battery voltages between 220VDC to 800VDC which are converted to lower voltages to power ...

The DC/DC converter converts 200 to 800V from the high-voltage battery to 12V low voltage. This lower voltage powers the head lamps, windshield wipers, instrument cluster, ECUs and ...

However, vehicles operating on an 800V network need to be capable of operating at 400V. To achieve this, they incorporate specific dedicated components such as on-board DC-DC ...

A device designed to change a direct current voltage input level to a one or more different direct current voltage output level.
