Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in ...

The study examines the need and role of energy storage in Switzerland for the years 2035 and 2050. It considers various types of storage -- electricity, heat, and gas/liquid storage -- and ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems ...

For the first time, a pilot project called Alacaes is developing a new system that stores electricity in the form of compressed air in the Swiss Alps, with the support of the Swiss ...

The project combines utility-scale storage with an AI data center and district heating network in an ambitious multi-use development. The Swiss developer started work this ...

For the first time, a pilot project called Alacaes is developing a new system that stores electricity in the form of compressed air in the ...

As the Alpine glaciers slowly melt away, Switzerland will have the opportunity to build new dams and artificial lakes in the mountains. This will increase energy storage capacity ...

The project combines utility-scale storage with an AI data center and district heating network in an ambitious multi-use ...
