We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

All of our product are mainly applied to independent home power generation, telecommunications base stations, street lighting in Rural and City, electricity supply for fishermen, herdsman, ...

Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential ...

Integrated Solar-Wind Power Container for Communications This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a ...

The BoxPower MiniBox is a pre-engineered solar power station, prefabricated inside a 4? x 8? palletized enclosure. All energy systems are equipped with a solar array, batteries, inverters, ...

The new energy communication base station supply ...

It is used in scenarios such as communication base stations, smart cities, transportation, power systems and other edge sites to provide stable power supply and optical distribution networks.
