What are Musashi energy solutions' lithium-ion capacitor cells?

Musashi Energy Solutions' lithium-ion capacitor cells are energy storage devices with high energy density and output density, and can charge and discharge large currents. While ensuring high safety, it has features such as high repetitive charge /discharge characteristics, small self-discharge, and a wide operating temperature range.

Why is a capacitor based energy solution important?

We understand that while producing clean energy is crucial, effectively managing and storing that energy is equally important to continue our decarbonization journey. Join us on our mission to incorporate the most dependable, secure, and long-lasting capacitor-based energy solutions for more intelligent energy storage.

Why is Sumitomo launching a large-scale energy storage platform?

One of the main reasons is the insufficient capacity of transmission lines. In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy storage platform that can compensate for this lack of transmission line capacity.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Our mission is to revolutionize energy storage solutions through the development and manufacturing of cutting-edge Hybrid ...

Musashi Energy Solutions develops, manufactures, and sells hybrid super capacitors (HSCs), which are attracting attention for the realization of a carbon-neutral society. HSC is a ...

The Japan Energy Storage Capacitor Market is witnessing significant segmentation across various applications, driven by increasing demand for efficient energy ...

Founded in 1950, Nichicon is a Japanese electronics company headquartered in Kyoto, Japan. The company specializes in ...

In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy storage platform that can compensate ...

In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy ...

Musashi Energy Solutions develops and sells LICs in shape of laminate-cell, prismatic-cell, and in module. Musashi Energy Solutions" lithium-ion capacitor cells are energy storage devices with ...

PowerX is revolutionizing energy storage by establishing a gigafactory in Japan dedicated to producing various energy storage solutions, including EV hyperchargers and home batteries.
