Is Con Edison putting the largest battery energy storage system in New York City?

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help meet summer electricity demand peaks. The installation is a 7.5-MW/30-MWh system located at a substation in the Fox Hills area of Staten Island, New York (Figure 1).

What is the largest battery storage project?

The largest US battery storage project is the Darden Clean Energy Project in California, approved in 2025, with a capacity of up to 4.6 GW (4,600 MW). Which is better, PSP or BESS? Pumped Storage Projects (PSP) are currently more cost-effective and preferred for longer-duration grid storage due to lower levelized cost and longer lifespan.

What is a BESS EMS & how does it work?

Integrating renewable power production, battery storage, and grid transmissions into one central platform, BESS operators can use an EMS to track the real-time performance and efficiency of their system's energy and financial activities.

Will large-scale energy storage help New York achieve a low-carbon future?

"The advent of large-scale energy storage technology also greatly increases our opportunities to integrate clean, renewable power into the mix and transition to a low-carbon future." New York state has ambitious energy storage goals of 1,500 MW by 2025 and 6,000 MW by 2030 through a variety of efforts.

Once completed, the Elevate Renewables project at the Arthur Kill Power Station will be the largest BESS installation in NYC.

STATEN ISLAND, N.Y. - NYC's largest Battery Energy Storage System (BESS) is complete and ready for connection, Con ...

Integrating renewable power production, battery storage, and grid transmissions into one central platform, BESS operators can use an EMS to track the real-time performance and efficiency of ...

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in ...

The New York City Economic Development Corporation (NYCEDC) and NYCIDA announced the five BESS

projects yesterday (23 ...

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help ...

MicroGrid Networks (MGN), a leader in New York City's clean energy transition, currently operates two BESS facilities in the city: one in Williamsburg, Brooklyn, and another in ...

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.
