Microsoft Corporation is an American multinational technology conglomerate headquartered in Redmond, Washington. Founded in 1975, the company became influential in the rise of per

Nov 18, 2025 | Frank X. Shaw - Chief Communications Officer, Microsoft From idea to deployment: The complete lifecycle of AI on display at Ignite 2025

The batteries feature large capacity, high energy density (compact), and long life, and can provide a stable supply of electric power with a high output over long periods of time.

Microsoft introduced the world's first quantum chip powered by a Topological Core, based on a revolutionary new class of materials developed by Microsoft, that it expects ...

A sodium-sulfur (NaS) battery is a type of molten-salt battery that uses liquid sodium and liquid sulfur electrodes. [1][2] This type of battery has a similar energy density to lithium-ion batteries, ...

NGK Insulators, a leading Japanese manufacturer of advanced ceramic technologies, today announced a significant ...

Rechargeable room-temperature sodium-sulfur (Na-S) and sodium-selenium (Na-Se) batteries are gaining extensive attention for potential large-scale energy storage ...

A sodium-sulfur (NaS) battery is a high-capacity, high-temperature energy storage system that stores energy using molten sodium and sulfur as active materials.
