---

Chinese battery giant CATL has detailed a wider and larger-scale deployment of its sodium-ion battery range across multiple sectors, including battery storage. Chinese media ...

CATL aims to grow its sodium-ion battery business. As announced at a supplier conference, sodium-ion batteries will be deployed on a large scale starting this year in battery ...

Energy storage beyond lithium ion explores solid-state, sodium-ion, and flow batteries, shaping next-gen energy storage for EVs, grids, and future power systems.

Lithium-ion batteries have become the dominant energy storage technology due to their high energy density, long cycle life, and suitability for a wide range of applications.

CATL plans large-scale sodium-ion battery deployment in 2026 for swap systems, EVs, and energy storage. Its Naxtra cells offer up to 175 Wh/kg energy density, -40 °C ...

The station employs China's first large-capacity sodium-ion battery, which responds six times faster than existing models, and combines it with established lithium ...

This large-scale BESS demonstrates how hybrid solutions can enhance energy storage capacity and flexibility. By utilizing sodium-ion batteries for specific applications while ...

Contemporary Amperex Technology Co., Ltd. (CATL) said at its supplier conference in Ningde, Fujian province, on December 28, 2025, that it plans to deploy its ...
