-----

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and ...

10kW integrated system with up to 15kWh capacity, LFP (lithium iron phosphate) battery, reliable energy storage, over 6000 cycles at 90% depth of discharge, ensuring long-lasting ...

Latvia's energy storage sector is rapidly evolving to meet EU sustainability goals. This article explores companies developing energy storage power stations in Latvia, market trends, and ...

Latvian power storage manufacturers are reshaping Europe's renewable energy landscape with cutting-edge battery systems and grid stabilization technologies. Discover how these solutions ...

Growing expertise in hydrogen pilots, energy storage, maritime digitalisation and smart city systems. Strong engineering and manufacturing capabilities supporting EV components, ...

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, ...

This bright system will continuously monitor and control energy flows, analyzing market fluctuations and autonomously adjusting the system to recharge or discharge electricity ...
