SunTrain, a U.S.-based energy transportation innovator, is tackling the challenge of renewable energy distribution with a novel solution: battery-powered trains rolling fully ...

By converting battery storage into rail cars that transport clean energy from remote solar and wind farms directly to urban centers, SunTrain offers a practical solution without the ...

Allegro Energy CEO Thomas Nann explains how the startup's new energy storage solutions can help power the light rail sector. Companies in the rail sector are actively working ...

SunTrain seamlessly stores green energy from remote solar and wind farms within customized battery containers that are transported over existing railroad networks.

SunTrain wants to use the existing freight rail system to transport clean energy from wind farms and solar arrays to the grid.

SunTrain charges LFPs with wind and solar energy and transports the fully charged batteries on a large train to locations where renewable energy access is needed.

SunTrain is hoping to ship renewable energy via battery-powered trains, charged from solar and wind, using rail networks.

PUEBLO, Colo. -- SunTrain, a San Francisco company, is designing a method to transport power by rail, moving containerized batteries between solar and wind farms in ...
